B. Volvv-e Animation Commission — Fiverr Brief

What to search on Fiverr: "pixel art animation sprite" or "pixel character animation"

Budget: \$30–\$80 | **Turnaround:** 2–5 days

Brief to send the artist:

We have a pixel art character (attached PNG). We need 3 simple animations exported as transparent-background GIFs and PNGs:

- IDLE FLOAT** — gentle up/down floating bob, 4–6 frames, seamless loop. Character should feel like a ghost hovering.
- REACTION** — a quick "shake head / facepalm" motion, 4 frames, one-shot (not looping). Used for "this is bad" moments.
- WAVE / APPROVE** — character waves or gives thumbs up, 4 frames, one-shot. Used for positive/outro moments.

Keep strictly to the existing pixel art style. Same red (#8C2B1A) and white (#faf7f0) colors. Black or transparent background. Export each as: transparent PNG sprite sheet + individual GIF. Canvas size: 240×320px per frame.

Files to attach: Volvv-e PNG (the red pixel ghost character)

C. Outro Card — Build This Once, Use Forever

Build in CapCut as a saved template. Drop onto every video.

Specs: 1080×1920px (9:16 vertical) | Duration: 2.5 seconds

Elements to include (layer order, bottom to top):

1. Background: solid #141413 (ink black)
2. Subtle grid overlay: 32px grid lines, 3% opacity white
3. Volvv-e animation (idle float, centered-right, 60% height)
4. eevolvv wordmark (Space Grotesk 600, #faf7f0, centered-left, large)
5. eevolvv.com (JetBrains Mono, #8C2B1A accent red, below wordmark)
6. Episode slogan placeholder (Space Grotesk 400 italic, #faf7f0, 70% opacity — swap per video)

Sound: Short pixel "bloop" or swoosh sound effect (search "pixel beep" in CapCut audio library)

Animation: Volvv-e slides in from right (0.3s ease). Wordmark fades up (0.4s). URL pops in (0.1s delay). Slogan types in or fades (0.5s).

SAVE AS: "eevolv_v1" in CapCut templates. Every video ends with this card.

SECTION 05 — ANALYTICS: WHAT TO WATCH

Week 1–2: Baseline

Post all Tier 1 formats. Track these numbers per video:

Metric	What It Tells You
Watch time %	Did they stay to the outro? >50% = good
Saves	High saves = message resonated with business owners
Shares	High shares = viral potential
Comments	What people say reveals their ghost work pain
Profile visits	Are viewers clicking to learn more?
Link clicks	Direct bottom-line metric

Week 3–4: Double Down

If one format outperforms all others → write 15 more scripts for that format immediately.

Track by format (not individual video):

Format	Avg Views	Avg Watch %	Saves	Shares	Verdict
Things Nobody Talks About	—	—	—	—	—
POV:	—	—	—	—	—
Breaking News	—	—	—	—	—
Hot Takes	—	—	—	—	—
Rate My Process	—	—	—	—	—
Ghost Work Confessions	—	—	—	—	—
Storytime	—	—	—	—	—

The format with the highest Saves + Shares combined = write 15 more scripts for it next.

Month 2+: Unlock Tier 2 Formats

Once you have data, add production capacity for:

- Game show formats (balloon pop, buzzer, debate) — need props + 2 people
